Career Objective

A dedicated and ambitious Software Engineer with strong problem-solving abilities, proficient in full-stack web development, and passionate about creating scalable, secure, and efficient applications

Education

2021

2021-2025	B.Tech - Computer Science with Specialization in Full Stack Development	76%
	Lovely Professional University, Punjab	

2019	10 th (Matriculation)	88%

St. Mary's Higher Secondary School, Madhya Pradesh

St. Mary's Higher Secondary School, Madhya Pradesh

Internships & Trainings

June-July'2023

Data Structures and Algorithms - (Solving Competitive Problems), Punjab

- Excelled in solving complex problems through a structured training program.
- Developed proficiency in implementing algorithms to address computational challenges.
- Gained expertise in data structures such as arrays, linked list for optimized solutions.

Academic Projects

January'2025

Emergency Train Ticket

12th (Intermediate)

- Platform to exchange unused train tickets during emergencies.
- Domain: Web Application.
- Tech Stack: React, MySQL, Node.js.
- Acquired practical knowledge of API integration and functionality.

June'2024

Internship Opportunity (MERN)

- Built a platform to display available internship opportunities.
- Tech Stack: React, Node.js, MongoDB.
- Display all available internship opportunities.
- Learned authentication mechanisms, cookies, and caching techniques.

March'2025

Blockchain-Based E-Voting

- Created a secure online voting platform using blockchain technology.
- Tech Stack: React, MongoDB, Node.js, Ethereum Blockchain.
- Storing voting data in an Ethereum blockchain contract.
- Gained insights into linked-list structures in blockchain data storage.

Technical Skills

Languages Web technology Databases Tools

C, C++, Java, Python, SQL HTML, CSS, Node.js, React MySQL, MongoDB

Ubuntu, VMware, VS Code, Docker, WordPress.

ACHIEVEMENTS:

October'2023 January'2021

- Qualified for Smart India Hackathon
- Medalist in Chess
